

Think like a Hacker and neutralize threats

RedRok is a forward-thinking cybersecurity platform leveraging a "hacker philosophy" to forecast and counteract threats. It features agentless scanning, real-time threat analysis, and in-depth cybersecurity training to strengthen defensive measures.

RedRok

Red

Scan the Dark Web for exposed company data and leaked credentials.

Exsight

Detect external network vulnerabilities, and visualize potential breaches.

Insight

Get real-time insights on unusual user activity, and changes in permissions.

Rokware

Train to identify scams with live simulation, and educate with interactive tools.
