INTRODUCTION

Rokware emphasizes a forward-looking approach to cybersecurity awareness, focusing on early threat detection through real-world simulations. These simulations replicate the strategies used by cyber attackers and provide users with the necessary insight to identify and neutralize threats before they can be exploited. Rokware also strongly emphasizes practical training, ensuring users can act quickly and effectively against potential cyber threats.

Rokware tailors security campaigns to address each organization's specific challenges and vulnerabilities. The company leverages interactive content to educate and engage employees, promoting a security-aware workplace culture. By integrating cybersecurity into daily operations, Rokware ensures that employees understand the risks and actively work to prevent cyber scams and attacks.

Rokware uses advanced analytics and insights to guide continuous improvement in cybersecurity practices. By analyzing the outcomes of simulations and training exercises, Rokware provides actionable intelligence to organizations. This data-driven feedback helps identify areas for improvement and celebrate progress, motivating teams to strive for higher standards in cybersecurity readiness.

ROKWARE BENEFITS

EDUCATE

Rokware is committed to equipping your team with the knowledge and expertise to recognize and respond to evolving digital threats. Our training and awareness programs ensure that your workforce is well-prepared and vigilant.

EVALUATE

Our state-of-the-art system conducts simulated phishing campaigns, meticulously assessing your organization's cyberattack vulnerability. This evaluation is a critical starting point in your journey to enhanced security.

SIMULATE

Through realistic and controlled simulations, we replicate cyber threat scenarios to identify weak points in your defenses. Doing so, we help you develop a targeted strategy for fortifying your digital infrastructure.

FORTIFY

Armed with insights from our evaluations and simulations, Rokware assists you in strengthening your digital fortifications. Our team works closely with yours to implement effective countermeasures, from software upgrades to employee training, reducing your vulnerability to cyber threats.

ROKWARE FEATURES

CUSTOMIZED CAMPAIGNS

Our tailored phishing campaigns are designed to mimic real-world threats, creating a controlled environment for your team to recognize and respond to potential vulnerabilities.

PHISHING CAMPAIGNS

Phishing campaigns are deceitful online schemes to trick individuals or organizations into divulging sensitive information. Cybercriminals use fake emails or websites to impersonate trusted entities, like banks or social media platforms. Vigilance and cybersecurity measures are crucial defenses against these pervasive online threats.

SMISHING CAMPAIGNS

Smishing campaigns are a variant of phishing, but they use text messages or SMS to deceive individuals into revealing personal information or clicking malicious links. These messages often impersonate trusted sources, creating a sense of urgency to manipulate victims. Awareness and caution are vital in guarding against smishing threats.

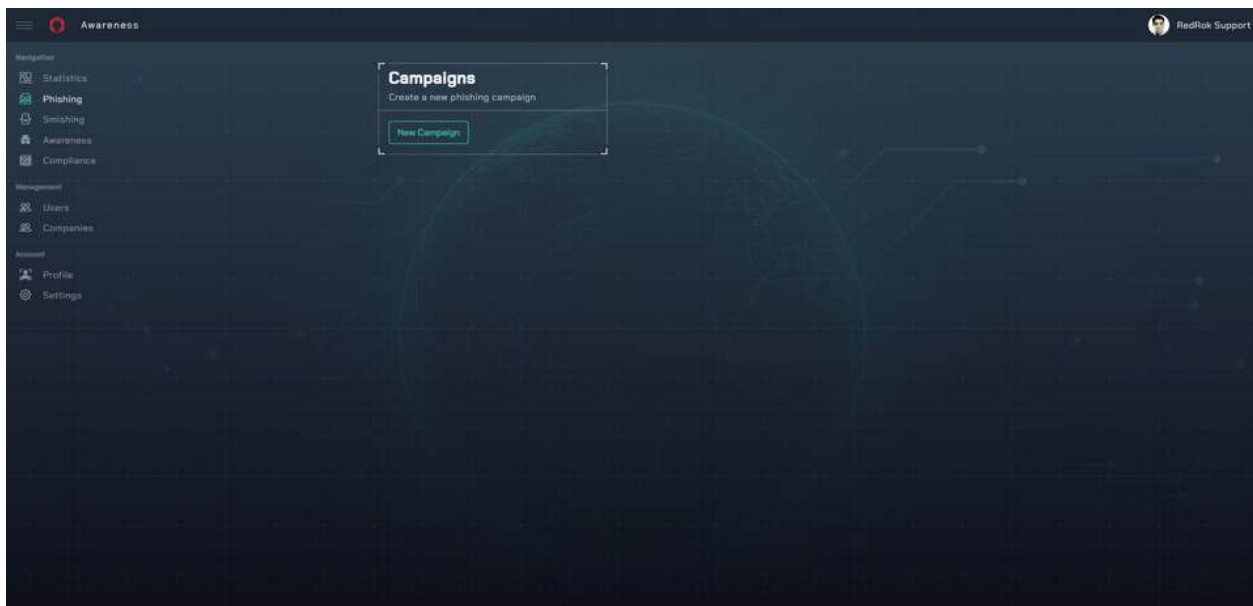

VISHING CAMPAIGNS

Vishing campaigns involve voice calls to trick individuals into disclosing sensitive information, often impersonating legitimate organizations or authorities. Fraudsters use social engineering tactics and urgency to manipulate victims. Awareness, verification of caller identity, and not sharing personal information over the phone are crucial defenses against vishing attacks.

PHISHING CUSTOM

COMPLIANCE

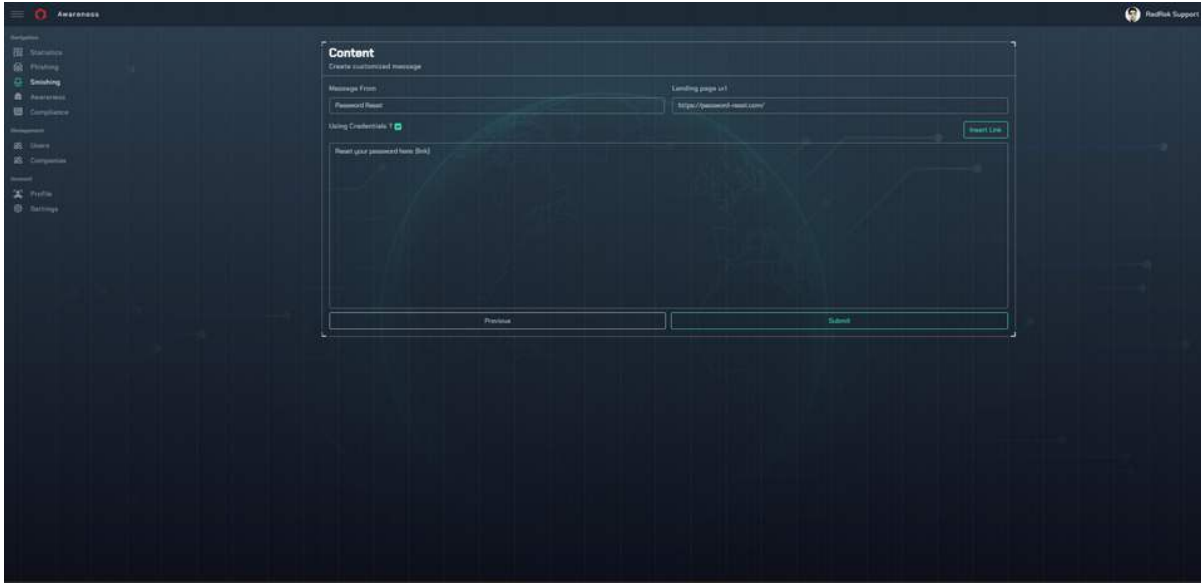

COMPLIANCE 2

The screenshot displays a dark-themed interface for a GDPR compliance tool. At the top, it says 'GDPR' with a close button. Below that, it lists 'Art. 39 Tasks of the data protection officer' with four sub-points (a, b, c, d) detailing the officer's responsibilities. The second section is 'Art. 47 Binding corporate rules' with two main points (1 and 2) and sub-points (a, b, c) describing the conditions for such rules. At the bottom right of the content area, there are two buttons labeled 'Art. 39' and 'Art. 47'. The background of the interface is dark blue with faint, large text like 'GDPR', 'NERC', 'ACTA', and 'CCPA'.

SMISHING CUSTOM

STATISTICS

The screenshot shows a web interface for 'Awareness' with a sidebar menu and a main content area. The sidebar includes sections for 'Navigation' (Statistics, Phishing, Smishing, Awareness, Compliance), 'Management' (Users, Companies), and 'Account' (Profile, Settings). The main content area displays a 'Campaigns list' table with the following data:

Name	Type	Created	Sent	Clicked	Failed	Status
All Company 23	Awareness	2023-09-06 09:26:38	[150/2500]	[15/150]	0	In Progress
Employees Aug 23	Smishing	2023-08-27 14:34:24	[2250/2250]	[1554/2250]	0	Done
IT Jul 23	Smishing	2023-07-13 07:29:44	[100/100]	[26/100]	0	Done
Employees Jul 23	Phishing	2023-07-05 07:36:25	[2250/2250]	[2006/2250]	0	Done
Managers Jul 23	Phishing	2023-07-04 15:08:35	[50/50]	[12/50]	0	Done
All Company Jun 23	Awareness	2023-06-04 07:59:16	[2500/2500]	[2248/2500]	0	Done
Employees Jun 23	Smishing	2023-06-28 07:33:21	[2500/2500]	[1150/2500]	0	Done
Managers Jun 23	Smishing	2023-06-28 07:25:23	[50/50]	[40/50]	0	Done
IT Jun 23	Smishing	2023-06-13 07:37:31	[100/100]	[67/100]	0	Done
All Company 23	Awareness	2023-03-06 09:12:05	[2500/2500]	[2258/2500]	0	Done

At the bottom of the table, it says 'Showing 1 to 10 of 128 entries' and includes a pagination control with buttons for 'Previous', '1', '2', '3', '4', '5', '13', and 'Next'.

Rokware

SUMMARY

RedRok's Rokware is a comprehensive security and privacy awareness platform. With Rokware, organizations can access fully automated and managed services to develop and implement effective cybersecurity awareness campaigns and training programs. This platform empowers employees with the knowledge and skills to identify and prevent various security threats, including phishing, smishing attacks, fishing, and more. By working together, organizations can foster a culture of security awareness and defend from evolving cyber risks and online scams.
