# RedRok Platform

Eliminate Risk and Exposure with Proactive Cybersecurity

RedRok is a unified cybersecurity platform that utilizes advanced analytics and real-time threat intelligence to protect against internal and external Cyber threats.

SECURITY THAT IS ALWAYS READY

GATHER INTELLIGENCE

Scan the Dark Web with our AI-powered Cyber Intelligence and proactively monitor for leaked information and online threats.

VISUALIZE BREACHES

Identify vulnerabilities before they become breaches with our comprehensive network assets vulnerability scanning.

### MONITOR INTERNAL THREATS

Monitor and manage internal risks with real-time insights into your organization's roles, permissions, and operations.

SIMULATE ATTACKS

Empower your workforce with the knowledge to recognize and counteract cyber threats through phishing, smishing, and vishing simulation.
